

THE PRODUCT

2-Component Urethane (can be sprayed or poured)

Fire Retardant

Closed-cell foam means no air holes or water absorption

The injection process increases the density by compression to 5-6 lbs. per cubic foot

The foam conforms to any shape vessel, creating a custom fit for your tub or shower

THE ADVANTAGES

Insulates the tub or shower, helping you stay warmer longer

Bonds directly to the tub/shower

Rigidizes the product creating a safe, solid surface for bathers

Levels the tub so you can be assured of a quality install

Covers the entire base of tub, ensuring the highest quality product

Lifetime warranty means you can bathe with peace of mind

NAHB certified and quality tested.
